## Pic Serial Communication Tutorial Contouring

We start by computing the contours of the object(s) in the image on Line 65 and 66.. Now the problem is that the demo project provided by Microchip is written so that it can be burned on different devices, with different circuits, or with different conditions - that makes it large, and for me at least, harder to understand.. h, USB PIC18 h, usb\_function\_cdc h, usb\_function\_cdc c and add them to the MPLAB X project.. Some steps I did and may be useful for you First, let's create a stand alone project: 1) I assume you have downloaded and installed the MAL (Microchip Application Libraries)..
